

Your Selection of Valve Technology Matters

Make an impact on the performance and profitability of your operations.

Isolation & Actuation University | 5 Cities | June 4, 6, 11, 13, & 18

Discover a Wide Range of Choices

Ask our experts to recommend the perfect solution for your valve automation needs. Whether you are considering electric, pneumatic, or hydraulic powered valves, or whether the design requires linear, quarter turn, manual, or automated valves, our experts have the right technology and product specifications to fit your operations.

Agenda

- 8AM** Arrival and Light Breakfast
- 9AM** Isolation Valve Types and How To Make a Selection
- 10AM** Actuator Types and How To Make a Selection
- 11AM** Application and Design Best Practices
- Noon** Lunch
- 1PM** Valve and Actuator Sizing Basics
- 2PM** Diagnostics and Troubleshooting
- 3PM** Maintenance
- 4PM** Q&A and Demos

Ideal Participants

- Maintenance Planners, Schedulers, and Technicians
- Maintenance Supervisors
- Project Engineers
- Reliability Departments
- Electrical & Instrumentation Departments
- Safety & Environmental Departments
- Anyone interested in learning about Isolation and Actuation technology/applications

Join Us at the Location Most Convenient for You

8AM-4PM at all locations. Earn 3 CEUs for attending.

- June 4** | St. Louis, MO
- June 6** | Decatur, IL
- June 11** | Memphis, TN
- June 13** | Calvert City, KY
- June 18** | Kansas City, KS

Isolation and Actuation University is a practical approach to understanding automated valve types and applications. The purpose of the course is to provide a fundamental understanding of the different isolation valves and actuation types. The course includes real-world examples, best practices, selection criteria, and maintenance tips for effective operation.
