

Intranet Information Reports

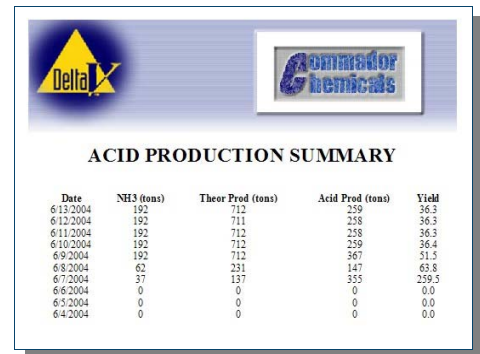

A key factor in reaching the goals of *Operational Excellence* in process manufacturing is having the information flow from the plant floor to the decision maker's desk. Experitec can design a Web page for use on your Intranet that can pull information from the control system and deliver it to your Intranet.

Intranet Information Reports can help you meet your goals by providing:

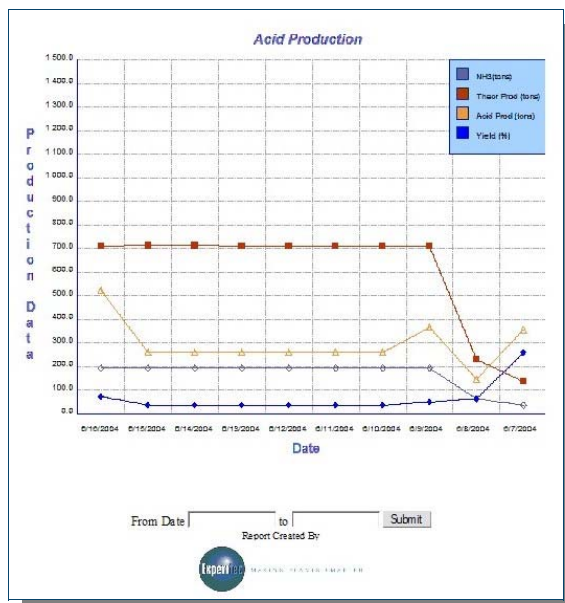

- Customizable information bringing only the critical information at your fingertips
- User-defined parameters
- Daily report calculations

Reduce the time required to gather information by:

- Providing a Daily Production Report
- Viewing Raw Material Usage
- Calculating Daily/Weekly Yields
- Viewing Inventory in the Plant
- Selecting Key Process Parameters and Dates

Date	NH3 (tons)	Theor Prod (tons)	Acid Prod (tons)	Yield
6/13/2004	192	712	259	36.3
6/12/2004	192	711	258	36.3
6/11/2004	192	712	258	36.3
6/10/2004	192	712	259	36.4
6/9/2004	192	712	367	51.5
6/8/2004	62	231	147	63.8
6/7/2004	37	137	355	259.5
6/6/2004	0	0	0	0.0
6/5/2004	0	0	0	0.0
6/4/2004	0	0	0	0.0

What's Involved?

Due to the open architecture of our web development tools, Experitec can have a report delivered on your Intranet in a matter of days.

Flexibility

Experitec can tailor the Information Reports to have the look and feel you desire. All you need is a control system with a historical database.
