Performance Services

Brad has over ten years of experience in the process control industry, eight of which have been with Experitec. He has participated in startup, troubleshooting, and configuration projects utilizing Provox hardware; DeltaV hardware, software and configuration; ROC hardware, software and configuration; Field Instrument Calibration; and DPR9xx controllers.

Highlights

PLC startup of yeast separating equipment at Anheuser-Busch Co. Colorado brewery.

In-house DeltaV configuration, onsite DeltaV commissioning, startup, and checkout of many units.

Interface and resource for Union Electricians during field hardware/wiring installation.

Onsite Fieldbus installations.

Onsite DeltaV interface for Provox installation/commissioning, onsite configuration, and troubleshooting.

Onsite ROC installations, startup support, and Field instrumentation calibration at Gas turbines throughout Illinois and Missouri.

In-house ROC configuration, onsite installation and startup of Modbus interface to Benchmark RTUs.

Interfaced Roclinc for Windows to ROC 500 series computer Via CDPD modem and customer LAN.

Upgraded Provox SR90 controllers to SRx controllers.

Onsite Provox I/O installations and troubleshooting.
