

MAKING PLANTS SMARTER.

Steve Thomas Engineer, Plant Performance Services

Steve.Thomas@Experitec.com www.experitec.com

Performance Services

Steve has over 24 years of experience with a wide variety of Fisher-Rosemount products and service. His experience covers maintenance and troubleshooting of valves and flow meters to complete project execution of DCS systems from design to startup. He has participated in several DeltaV projects within Experitec in the last few years, with Delta V batch experience. Steve was the primary contact and resource in executing the Customer Support Solutions Agreement between Experitec Inc. and the Bayer Agriculture Hawthorne facility for the last several years.

Highlights

Lead Project Engineer for the 45 Methylation conversion project for the Bayer Sencor plant.

Lead Project Engineer for the Pina conversion project for the Bayer Sencor Plant.

Directly responsible and accountable for execution of all DCS related projects and plant support at the Bayer Agriculture Hawthorne facility.

Responsible for execution of all DCS related projects and plant support for the National Starch and Chemical Company facility.
