

Pete Wright, Service Technician, Plant Performance Services

Pete.Wright@Expertec.com www.expertec.com

Performance Services

Pete has over fifteen years of experience in the process control industry. Pete has participated in startup, troubleshooting, and configuration projects utilizing DeltaV, Cygnet, iFix, Fix32 hardware, software and configuration; ROC hardware, software and configuration.

Highlights

- Installation and calibration of SCADA systems.
- Installation of Fisher Flow Computers, configuration and maintenance.
- System conception design and programming.
- Modbus, configuration and implementation.
- Frequency drive configuration and interface.
- Municipal water system (SCADA) engineer.
- Wireless communication for data acquisition.
- RocPac to FlashPac upgrades.
- DeltaV comissioning of Bio Reactor
- Asset Optimization

Technical Experience

IEC 61131
 Visual Basic
 Intellution iFix
 Fix32
 Cygnet
 Excel Advanced VBA
 TurboCad
 Advanced HMI Programmer
 Ladder Logic
 Function Block
 Structured Text
 Telemetry System Design and Installation
 Block & Assoc. - Mechanical Master
 EPA - Universal Refrigeration Certification
 Touchscreen (HMIs)
 Modbus RTU
