

Meeting All Your Final Control Needs, Everywhere

With the acquisition of Pentair Valves & Controls, Emerson is bringing together the recognized leaders in the industry: one from the control valve space and one from the isolation and pressure relief markets. Emerson now has a full portfolio of final control products, led with monitoring and diagnostic technology, and supported by the broadest service network globally. We can design, manufacture, deliver, install, and service everything related to final control—control valves, pressure relief valves, automated valves, isolation valves, actuators, and regulators.

- + Working with one trusted partner, we'll help you take the complexity out of the procurement arm and help ensure compatibility of technologies.
- + In terms of your projects, as a single manufacturer, we can positively impact timing and delivery.
- + And on the lifecycle side, we bring an expanded range of services at the site level.
